GENERAL INFORMATION

SUPRA-POLY 24-0-0-0.5%B is a liquid foliar fertilizer designed for application on cotton and other crops requiring supplemental N during the growing season. A portion of the nitrogen is in a control release form providing more efficient nitrogen utilization. In addition, it contains Boron which is often deficient in certain crops suffering from disease pressure or drought conditions. SUPRA-POLY 24-0-0-0.5%B is recommended as a carrier for pesticides. The control release nitrogen prolongs the wetting of leaf surfaces for greater penetration and less loss from crystallization on leaf surfaces as with liquid urea products

DIRECTIONS FOR USE

SUPRA-POLY 10-0-10-0.5%B can be soil or foliar applied through ground or aerial applications. Use sufficient water for thorough and uniform coverage of foliage or soil. Foliar application is recommended when fast correction is desired.

SUPRA-POLY 24-0-0-0.5%B will disperse in water with minimal agitation. Always check compatibility before mixing. Follow the mixing sequence: 1. Water; 2. SUPRA-POLY 24-0-0-0.5%B; 3. Pesticide.

RECOMMENDED RATES

The optimum rate and timing of application will depend on local conditions and should always be made as a result of soil and/or plant tissue analysis. Local climatic conditions, infestations and other factors affect the performance of any pesticide or nutritional spray, so consult with your local agricultural authorities for specific use information in your area.
